

# \$RBAX Tokenomics

Version 1.08

## The \$RBAX Token Utility

\$RBAX will be available across all games of the Rebel Bots brand. \$RBAX is a utility token created for the use of our players.

*Economic Incentives:* Through the tokenization of rewards, achievements, and contributions, \$RBAX incentivizes active participation and best gamers as rewards. Players of the Rebel Bots Brand can receive and earn \$RBAX based on their participation and performance in the games.

*Web3 onboarding:* a buy-product of holding \$RBAX is the incentivization of player to engage in the web3 sphere and trade the token on the exchanges. By that, contributing to the onramp of casual player into the web3.

Rebel Bots Studio is committed to driving widespread adoption of \$RBAX across the gaming industry by collaborating with game developers, platforms, and communities. By embracing the principles of decentralization, inclusivity, and innovation, we envision \$RBAX as a catalyst for the next evolution of gaming.
